

JAY EDEESON I. OPINA

Web Developer

FEU Diliman

edeesonopinav4@gmail.com / +63 956-391-9724

PROFILE

Laravel + AngularJS Developer – I'm using the Laravel Framework as my top choice when starting off a web development project which focuses more on security and easier query building that saves so much time when developing a web project. Combining it with AngularJS makes it more dynamically beautiful while maintaining the security of your web project.

Freelance Web Developer – I started being a freelance developer as early as 18 years old I started first as a Web Designer since I was trying to tinker the Bootstrap Framework and by the age of 19 years old I worked with the PHP language and started to develop not only the web design but also the system itself. Later decided to research about frameworks then used those new technologies to improve my projects.

Mozilla Firefox Student Ambassador PH 2014 – During the year 2014 I was one of the selected representatives of FEU as the Mozilla Firefox Student Ambassador PH to promote and help research on Web Security.

WORK BACKGROUND

Hospitality Institute of America - Philippines

July 2016 – July 2017

IT Specialist

HIAP offers Culinary Shipboard training, food & beverage training programs in order to meet the requirements of various international cruise lines and land based hotel establishments. It also offers short course programs for

Hospitality and Tourism Management that caters for Senior High students, college students and professionals. A customized training program is also available for students and professionals who wish to undergo half day or whole day training seminar-workshops based on the topic of interest.

Responsibilities:

- **Network Admin**

Handling of emails, domains, files, able to control everything via putty (Linux OS), able to create responsibilities of FTP users for filezilla.

- **Head of Research and Development**

Always makes sure that we have the latest technology for the development. If needed to surrender the Laravel perk due to there are better features in other languages. Security is my top priority. Can integrate both hardware and programs.

- **Full Stack Web Developer**

I can go in two ways of the web. The front and backend. I can make a web design depending on the client's taste even if he wants a website that looks like a wordpress I can imitate it hard coded without destroying the backend.

- **Quality Assurance**

I am in charge of the quality of the system I require many tests before letting a project go live to prevent huge errors coming. Strictly wanting to find bugs.

- **Head of Web Development**

I make sure that the project I've created can also be understood by others so I teach them how to handle this type of module. I make my codes clean and simple as much as possible I don't want the team to be intimidated by the code to prevent confusion.

- **E-commerce**

I am also the representative in the IT department to join work with the marketing team on what would be the wise decision to this project. Expenses, Tools, Time Management, Risks.

- **SEO**

Also paired with the Marketing Team for advertisements. I make sure that the IT Department will not have a conflict with the Marketing Strategy when it comes to SEO. Both department must have good communication on this one to make it work.

Zip Travel PH
July 2016 – July 2017
IT Specialist

Zip Travel Philippines (Inner Outer Travel, Inc.), established in 2009, is an affiliate of Zip Travel international, a world leader in the work and travel consultancy business with corporate office in Lithuania and satellite offices in the US and various countries in Europe.

Zip Travel International is proud to help facilitate students with the Exchange Visitor Program (EVP). In the Philippines, it has helped thousands and is still helping more and more students all over the land fulfill their vision of becoming globally-competitive in the hospitality industry via the cultural exchange program of the US government. The Exchange Visitor Program, facilitated by Zip Travel, is an international exchange program administered by the United States of America to implement the Mutual Education and Cultural Exchange Act of 1961, as amended, Public Law 87-256, 22 USC 2451, et. Seq. (1988). This includes the J1 work and travel and J1 internship programs. Thru the program, the men and women of Zip Travel are dedicated to helping Filipino's and those from other cultures gain a better understanding of one another and the world around them - reaching out to encourage a lifelong journey of global peace, respect, independence and inter-cultural understanding.

Responsibilities:

- **Network Admin**

Handling of emails, domains, files, able to control everything via putty (Linux OS), able to create responsibilities of FTP users for filezilla.

- **Head of Research and Development**
